Hi There!

Jeddah Piles is a leading construction and contracting company based in Saudi Arabia, specializing in enabling works, excavation, and dewatering solutions. With a reputation built on trust, innovation, and quality, we are proud to play a critical role in shaping the foundations of some of the Kingdom's most ambitious infrastructure and development projects.

Leveraging state-of-the-art equipment and cutting-edge technology, Jeddah Piles ensures efficiency, safety, and sustainability in every project we undertake. Whether it's preparing the ground for complex structures or delivering reliable dewatering services, we are committed to providing tailored solutions that meet the highest standards.

At Jeddah Piles, we don't just build foundations — we build confidence. Our team of skilled professionals is dedicated to supporting successful, sustainable developments that stand the test of time.

About Company

Founded with a vision to support the growing construction and infrastructure demands of Saudi Arabia, Jeddah Piles has quickly emerged as a trusted name in the field of enabling works and dewatering services. We specialize in excavation, foundation preparation, shoring systems, and water control solutions that form the backbone of safe and successful project execution.

With a team of highly experienced engineers, field specialists, and project managers, we take pride in delivering customized solutions that align with the unique needs of each client and site. From small-scale developments to large infrastructure projects, Jeddah Piles brings precision, professionalism, and performance to every job. Our strength lies in combining advanced technology with a deep understanding of ground behavior and water management, ensuring stability and sustainability from the ground up.

At Jeddah Piles, we believe that a strong foundation isn't just about the soil beneath—it's about the values we build on: integrity, quality, and commitment to excellence.

CGO Message

I am deeply honored to lead an exceptional and visionary team that stands at the cutting edge of innovation, transformation, and strategic excellence. Our journey is fueled by a relentless commitment to unlocking potential, embracing change, and delivering long-term value across every facet of our organization.

**Mohammed
Al-wahbi**

By harnessing the collective strength, diverse expertise, and operational agility of our subsidiaries, we create powerful synergies that accelerate growth, foster innovation, and amplify our impact across industries. Our integrated approach ensures that every decision contributes meaningfully to our shared vision of sustainable progress and leadership.

With an unwavering focus on aligning our corporate strategy with the ever-evolving dynamics of global markets, we remain agile, forward-thinking, and purpose-driven. Together, we are not just adapting to change—we are shaping the future.

CEO Message

At Jeddah Piles, we believe that every successful structure begins with a solid foundation—both in engineering and in values.

Since our establishment, our mission has been clear: to deliver reliable, high-quality enabling and dewatering solutions that support the Kingdom's ambitious development goals.

As Saudi Arabia continues to grow and transform, we are proud to contribute to this journey by laying the groundwork for projects that define progress and innovation.

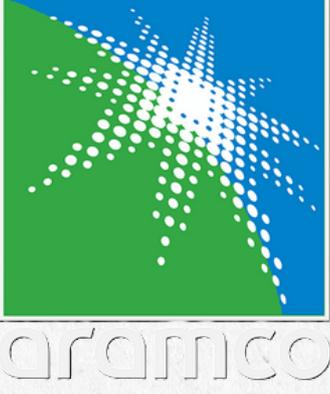

What sets us apart is not just our technology or equipment—it's our people, our passion, and our promise to always deliver with integrity and excellence. Every project we take on is a reflection of our commitment to safety, sustainability, and client satisfaction.

Looking ahead, we are focused on growth, innovation, and continuous improvement. We are investing in advanced methods, training, and partnerships that allow us to better serve our clients and the communities we operate in. Thank you for trusting Jeddah Piles. We are honored to be the stake you can rely on.

How We Work

Assessment & Planning

We begin by conducting a thorough site analysis and understanding the client's needs. Our experts develop a detailed action plan tailored to the specific soil, water, and structural conditions of the project.

Execution with Precision

Using advanced equipment and experienced crews, we carry out excavation, dewatering, shoring, and other enabling works with strict adherence to safety, efficiency, and quality standards.

Monitoring & Handover

We continuously monitor project performance and ground conditions to ensure stability and reliability. Upon completion, we hand over a well-prepared site—ready for the next stage of construction.

Our Service

At Jeddah Piles, we specialize in providing comprehensive enabling and dewatering services designed to ensure the safe, efficient, and sustainable development of construction projects across the Kingdom. Our services are tailored to meet the unique needs of each project, backed by the latest technology, industry expertise, and a strong commitment to quality and safety.

In addition, we provide dewatering systems that are crucial for managing groundwater on construction sites. With options like well-point and deep well dewatering, we create dry, stable working conditions, preventing delays caused by water accumulation and ensuring structural integrity throughout the construction process.

MILESTONE

2022 - Growth & Expansion

- Integrated cutting-edge technology for real-time monitoring and project optimization.
- Contributed to key Vision 2030 infrastructure initiatives.
- Launched sustainability-driven practices to reduce environmental impact.
- Strengthened brand presence as a trusted leader in enabling and dewatering works.

2023 - Building Momentum

- Expanded operations across multiple regions in the Kingdom.
- Delivered over 25+ high-impact projects with a strong focus on safety and precision.
- Doubled team size with skilled engineers, project managers, and field crews.
- Rolled out internal quality and safety management systems.

2024 - Innovation & Impact

- Adopted smart technologies for site monitoring and efficiency tracking.
- Strengthened presence in large-scale infrastructure and Vision 2030-related projects.
- Introduced environmentally conscious practices to enhance sustainability.
- Recognized as a dependable partner in Saudi Arabia's construction and development ecosystem.

VISION & MISSION

Vision

At Jeddah Piles, our vision is to become the foremost name in enabling works and dewatering services across the Kingdom of Saudi Arabia and the wider region. We aim to lead the industry through cutting-edge technology, operational excellence, and a commitment to quality that sets new benchmarks in the construction sector.

We envision a future where our expertise supports the Kingdom's rapid development and infrastructure goals, in alignment with Saudi Vision 2030. Our role is foundational—literally and figuratively—as we help shape resilient, forward-thinking communities by ensuring that every project we support begins with strength, stability, and sustainability.

Mission

At Jeddah Piles, our mission is to provide safe, reliable, and high-quality enabling and dewatering solutions that lay the foundation for successful and sustainable projects. We are committed to delivering innovative services, building trust with our clients, and supporting the Kingdom's growth through excellence, integrity, and environmental responsibility.

Some Of Our Projects

Our Provisionals

At Jeddah Piles, we specialize in providing comprehensive enabling and dewatering solutions that prepare sites for safe, efficient, and long-lasting construction. Our services are designed to meet the highest industry standards while adapting to the unique needs of each project.

Dewatering Solutions

At the heart of every successful construction, excavation, or infrastructure project lies one vital element: dependable water control. At Jeddah Piles, we are proud to be industry leaders in delivering comprehensive, high-performance dewatering solutions that empower our clients to work with confidence—no matter the complexity of the site or the unpredictability of the ground conditions.

From precision-engineered well-point systems to robust deep well dewatering techniques, our services are designed to meet the full spectrum of water management needs. Whether your project involves sandy, silty, or clay-rich soils—or you're contending with high groundwater tables or difficult environmental constraints—Jeddah Piles brings the expertise, technology, and reliability required to keep your site dry, secure, and on schedule.

Water intrusion can jeopardize not only timelines but also safety, cost-efficiency, and structural integrity. That's why we go beyond simply removing water—we engineer stability, mitigate risk, and create the foundation for progress. With every system we install, we bring decades of industry insight, advanced equipment, and a deep understanding of site-specific challenges.

OUR SERVICE

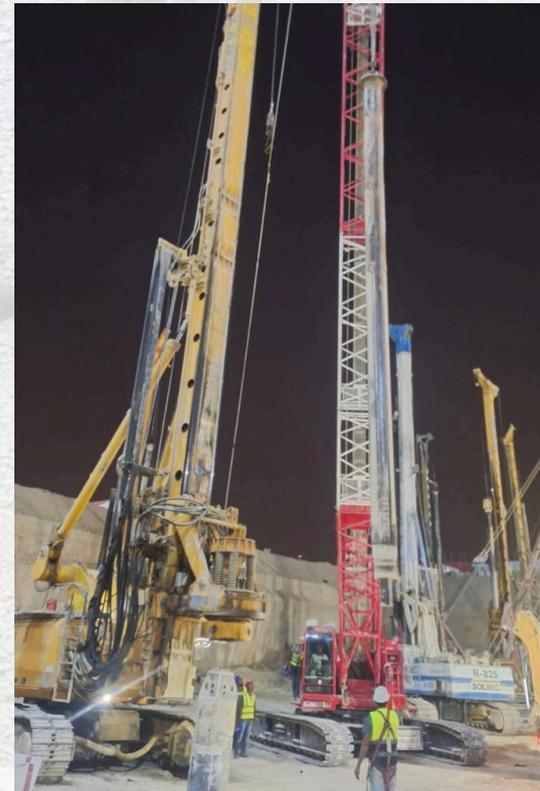

Enabling Works

At Jeddah Piles, we provide a comprehensive suite of enabling works designed to lay the essential groundwork for seamless, efficient, and safe construction. Our end-to-end services ensure that your project starts on solid footing—both literally and strategically—by preparing every element of the site for full-scale operations.

From initial site clearance and debris removal to meticulous access preparation and infrastructure planning, we handle the critical early stages that set the tone for success. Our team is equipped to deliver robust temporary facilities, essential utilities, and preliminary groundwork with precision, speed, and a deep understanding of project requirements.

Whether you're developing a high-rise, an industrial complex, or major civil infrastructure, our enabling works create a clean, organized, and construction-ready environment—minimizing delays, reducing risk, and allowing your core construction activities to proceed without disruption. Who understands that great projects begin with great preparation. Our integrated approach ensures every detail is handled with care, coordination, and a relentless commitment to quality.

How We Work

Site Evaluation & Planning

The process begins with a thorough evaluation of the site. Our team of experts conducts detailed assessments of soil conditions, groundwater levels, and project-specific requirements. Based on this analysis, we create a tailored plan that addresses the unique challenges of the project, ensuring that every aspect of the site is prepared for a successful construction phase. Our planning process includes a careful selection of equipment and techniques to meet project goals while adhering to the highest safety and environment

Execution & Support

Once the plan is in place, our experienced teams get to work, utilizing advanced machinery and specialized techniques to execute the excavation, dewatering, and enabling works. We maintain strict oversight throughout the entire process, continuously monitoring the site conditions and making adjustments as necessary to ensure the project stays on track. Our focus is on delivering a stable, secure site, ready for the next stage of construction. From initial excavation to final site preparation, we remain committed to quality, efficiency, and safety.

www.jeddahpiles.com

OUR GOALS

Deliver Excellence in Every Project

We aim to set new benchmarks in quality, safety, and reliability across all our enabling and dewatering works. Every project we take on is an opportunity to exceed expectations and build lasting trust with our clients.

Support Sustainable Growth

Aligned with Saudi Vision 2030, our goal is to play a vital role in the nation's development by providing solutions that are not only efficient but also environmentally responsible—contributing to a more resilient and sustainable future.

The Company Values

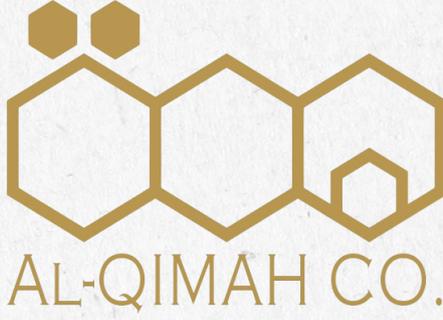

At Jeddah Piles, we are driven by a commitment to integrity, excellence, and safety in every project we take on. We believe in transparent communication, maintaining high standards, and delivering consistent results that exceed client expectations. Safety is always our top priority, ensuring that every site is secure for our team and stakeholders.

We also embrace innovation and sustainability, continually adopting new technologies to improve efficiency and reduce environmental impact. Our strong focus on teamwork ensures that we collaborate effectively with clients and partners, creating lasting relationships that contribute to the success and growth of every project.
